+1 (972)-765-8884 • himasathvika.nr@gmail.com • [linkedin.com/in/hima-nagi-reddy](https://www.linkedin.com/in/hima-nagi-reddy)

EDUCATION

The University of Texas at Dallas | Richardson, TX

Bachelor of Science in Computer Science, Minor in Business Administration | GPA: 3.51

AUGUST 2022 - MAY 2026

Master's in science in Computer Science

AUGUST 2026 – EXPECTED MAY 2027

Coppell High School | Coppell, TX

Endorsements: STEM, Multidisciplinary | GPA: 3.76

AUGUST 2018 – MAY 2022

SKILLS

Programming Languages: Java, Python, C/C++, HTML, CSS, JavaScript, Tailwind CSS

Frameworks & Tools: React.js, React Native, Node.js, MySQL, Git, Confluence, Supabase, Figma, Mailchimp

Deep Learning & Machine Learning: PyTorch, TensorFlow, NumPy, Pandas, Scikit-learn, Sequence modeling (LSTM, GRU, TCN)

Cloud Platforms and Deployment: Google Cloud, Vercel, Netlify

Other: REST APIs, UI/UX design, CRM tools(Salesforce, Airtable, Notion), ChatBot Integration

EXPERIENCE

Full-Stack Developer

AUGUST 2024 – PRESENT

Kappa Theta Pi – UT Dallas | Richardson, TX

- Architected and developed the official Kappa Theta Pi web platform from scratch using **React.js (Next.js)**, **JavaScript (ES6+)**, and **Supabase**, implementing scalable full-stack architecture with client-side rendering, API integration, and modular component design
- Built a production-ready **blog platform** with Supabase backend, implementing **PostgreSQL data modeling**, **JWT-based authentication**, and **role-based access control (admin/editor/user)**, along with post pinning and dynamic content rendering.
- Led UI/UX implementation from **Figma to responsive React components**, optimizing performance, state management and database queries to support **80+ active users and alumni** with real-time content updates.

Marketing Product Manager

JULY 2024 – OCTOBER 2024

Relish | Atlanta, GA

- Managed client relationships and project timelines, utilizing **Mailchimp** to automate and optimize targeted email campaigns, improving client engagement and outreach efficiency through data-driven segmentation and analytics.
- Enhanced brand visibility by creating data-driven, audience-targeted **LinkedIn content**. Integrated **reels** and **articles** to attract clients and influencers, driving strategic content planning that resulted in a 20% engagement increase
- Developed and maintained a dynamic **PR database** using **CRM tools** and **data management platforms**, streamlining outreach for events and partnerships, and automating contact updates to improve efficiency in brand communications.

Product Manager

JANUARY 2024 – AUGUST 2024

Nebula Labs - UT Dallas | Richardson, TX

- Spearheaded a team of 10+ developers in creating "Trends", a **responsive web application** that assists UTD students in selecting professors based on **comprehensive insights** into their ratings and historical grade data.
- Pioneered the development using **Next.js** and **Tailwind CSS** to ensure a **seamless** and **adaptive user interface**.
- Actively engaged in design **decision-making**, particularly in developing an **intuitive search functionality** that allows users to search for and prioritize professors or classes based on distinct criteria.
- Facilitated team **collaboration and documentation** by organizing regular meetings and maintaining thorough records in **Confluence**, ensuring alignment and continuity throughout the development process.

Web Application Developer

FEBRUARY 2024 – MAY 2024

Artificial Intelligence Society - UT Dallas | Richardson, TX

- Developed a **React-based web application** designed to streamline the process of uploading, editing, and annotating PDF files, enhanced with a chatbot for **real-time user assistance**.
- Implemented **JavaScript** for **dynamic functionalities** within the platform, leveraging **React** to build a **user-friendly**, interactive interface, and utilized **CSS** and **HTML** for responsive design.
- Designed an innovative split-screen feature that displays the PDF on one side while the chatbot operates on the other, facilitating **immediate interaction** and **guidance** during the editing process.
- Created **intuitive user controls** including file download buttons, **enhancing** the **usability** and **accessibility** of the application for all users.

PROJECTS and RESEARCH

Path-Based Prediction for 360 Degree Video Streaming

AUGUST 2025 – JANUARY 2026

- Built a 360° video gaze prediction pipeline in **Python (PyTorch, NumPy, Pandas)** to optimize 8K/12K streaming by predicting user head movement for bandwidth-efficient rendering.
- Processed VR headset quaternion data into time-series motion features (yaw/pitch, velocity, acceleration, sin/cos encoding) and generated large-scale training sequences for deep learning models.
- Trained and compared **LSTM, GRU, and TCN models in PyTorch**, achieving improved angular error with TCN and analyzing performance tradeoffs across sequence architectures.

FinFinity

JANUARY 2024 - MAY 2024

- Developed "FinFinity", a **financial web application**, as part of a software engineering class at the University of Texas at Dallas. The app assists students with financial management by tracking expenditures and budgeting income.
- Led the frontend development for all pages, utilizing **React**, **CSS**, and **HTML** to ensure a **responsive** and **user-friendly interface**.
- Created and integrated a chatbot feature within the application to offer tailored financial advice, helping users **optimize** their spending and **budgeting strategies**.
